Year of Manufacture	1997

GOLD B Refurbishment

GOLD B (=Safe, operational and functional + Full Paint + Maintenance high level "B")

Dear Customer

TCR is one of the only GSE second hand suppliers able to offer an excellent refurbishment condition all over Europe, with transport possibilities all over the world. This document describes in short the way how we guarantee the **GOLD B** condition.

All features related to the use of the unit are tested and repaired if needed, being:

- Driving functionalities (steering & pedal system)
- Operational functionalities (buttons, switches and handles) , lights and bulbs.
- Safety functionalities (tire profile/pressure, brakes, limit switches, emergency stops, horns, mirrors) and safety tests (For GPU: load bank test ; for loaders: ballast test)

+ Technical inspection: a complete revision of technical aspects and replaced where needed, being:

- Pneumatic and hydraulic hoses, pumps, engines and cylinders , fuel hoses and pumps
- Electricity wires , fuses (and engine, if applicable)
- Metal structure is visually checked on cracks & bents
- When equipped with engine: engine check and engine compression test
- Where applicable & possible: brake test with print-out
- Where applicable: battery electrolyt level
- Oil levels are verified and by doubt: a sample to laboratory and the recommendations on the report are implemented.
- Cockpit attire
- Equipment related items that are needed to guarantee the correct functioning

+ A maintenance level B (mostly the 500H maintenance frequency) contains:

- Greasing of all grease points
- Renewal of engine and gear oil
- Replacement of engine filters
- Extra controls and replacements as per manufacturer instructions in the manual.

+ A manual / mechanical removal of old paint & full painting of exterior and driver area + corroded inner parts. Full inside & outside cleaning (body works, widows, cockpit, technical area) with hot water and detergent. Where applicable new seats, panels and floor will be provided and when requested customer labels applied.

Attention: Airport/country related options are never included. If you have particular needs related to this or request via your safety committee, we are happy to install the necessary at a cost.
